Signal amplifier
for terrestrial TV antennas GLOMEX

Amplifier-Booster

Connects 6 TV at the same time, or to connect the antenna satellite from the pedestal of the dock.

5555305 Amplifier-Booster

Coaxial cable RG58U

for VHF antennas.

Coaxial cable RG59

for TV antennas.

Article	Description	Length mt.
5555235	Coaxial cable	roll 25
5555237	RG58EU	roll 100
5555306	Coaxial cable	roll 25
5555307	RG59U	roll 100

Splitter RA201

With this splitter you can use a single antenna to receive VHF signals simultaneously AM / FM radio and AIS, as well as to use the VHF transceiver. TECHNICAL Preamp: entrocontenuto Impedance: 50 Ohm Maximum power VHF: 100 W Power Supply: 12V Power consumption: 25 mA Inputs: 1 Outputs: 3 for AM / FM, AIS and VHF RTX

5555351 Splitter

Splitter

Glomex Splitter Two-way TV antenna. It allows you to send a terrestrial TV signal to two televisions or television receivers. 1 input, 2 outputs.
